PROFESSIONAL SUMMARY

Python and Backend Developer with hands-on experience building scalable REST APIs and AI/ML-powered applications. Strong expertise in Python frameworks such as FastAPI and Flask, along with solid knowledge of SQL databases and backend architecture.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, HTML, CSS

Framework: Fast API, Flask, Express.js, Node.js

Databases: MySQL, MongoDB

AI/ML: LLM, RAG, NLP, OpenAI API, Pandas, NumPy

DevOps & Tools: Git, CI/CD

Architecture: SaaS Platforms, Rest APIs

Business Support Executive – Techno Design GmbH Private Limited, Gurgaon, Haryana Mar 2026

- **SaaS Platform Handling:** Worked with cloud-based SaaS applications for data entry, record management, and realtime updates.
- **Data Verification & Quality Control:** Verified, corrected, and validated data to ensure consistency, completeness, and error-free records.
- **Basic Technical & Software Skills:** Proficient in MS Excel, Google Sheets, and online SaaS tools for data processing, reporting, and documentation.

Software Developer | Paramatrix Technologies Pvt. Ltd., Sanpada, Maharashtra Nov 2025 – Jan 2026

- Joined as a **Software Developer Intern**, where I worked with **Python** and **FastAPI** to design and develop web applications and RESTful APIs.
- Developed scalable web applications using **Python, MongoDB, and JavaScript**, supporting **1,000+ active users** while ensuring efficient backend performance and seamless functionality.

Full Stack Web Development Internship | Slash Mark IT Solutions Pvt Ltd Feb 2025 – Jun 2025

- Developed full-stack application features using Python FastAPI, MongoDB, and JavaScript to create fast and userfriendly web applications.
- Built secure REST APIs with proper routing, data validation, and asynchronous functionality for smooth backend operations.
- Improved backend system performance by optimizing controller logic and implementing effective error-handling mechanisms for better application stability.

KEY PROJECTS

- **Shop Flow – E-Commerce Platform:** Developed a full-stack e-commerce web application using Python (Fast API) for backend services and MongoDB for database management.
- **REST full Blog API:** Built a RESTful Blog API using Python with CRUD operations and database integration, focusing on clean code and scalable backend design.
- **Fake News Detection System:** Designed and implemented a machine learning-based fake news detection system using **Natural Language Processing (NLP)** techniques. Performed data preprocessing, feature extraction using TF-IDF, and trained classification models such as Logistic Regression and Naive Bayes.
- **AI-Powered Data Extraction and Reporting System**
Built a Python-based Data Extraction solution with ChatGPT API integration, leveraging Pandas for data processing, transformation, and automated Excel report generation.

EDUCATION

- **Master Of Computer Application (M.C.A)** PARUL UNIVERSITY, VADODARA | CGPA 7.4
- **Bachelor Of Science (BSc Mathematics)** V.B.S.P. UNIVERSITY, JOWNPUR | 59%

CERTIFICATIONS & ACHIEVEMENTS

- Python Basic Fundamental (Code with Harry)
- Python Data Science and ML (Code With Harry)
- Network and Internet Protocol (NPTEL)
